Art Requirements

angle labels

Angle labels are not **angle measures**. Angle measures are written in numbers with degree symbols.

See [point labels](#) in Art Requirements and [point labels](#) in Layout Requirements.

angle marks

arrowheads

art font

See [font](#) in Layout Requirements.

art labels

art perspective

Line segments are examples of 1D art.

Art pieces that include a square, graphs, and a T-shirt that is completely flat with no oval at the collar and no wrinkles are examples of 2D art.

Geometrical shapes, beakers, scales, art in an experiment setup, a T-shirt showing wrinkles and the collar as an oval with inside material shaded near the collar are examples of 3D art.

art text

The direction (vertical, horizontal, diagonal) of all art text will be decided based upon the art.

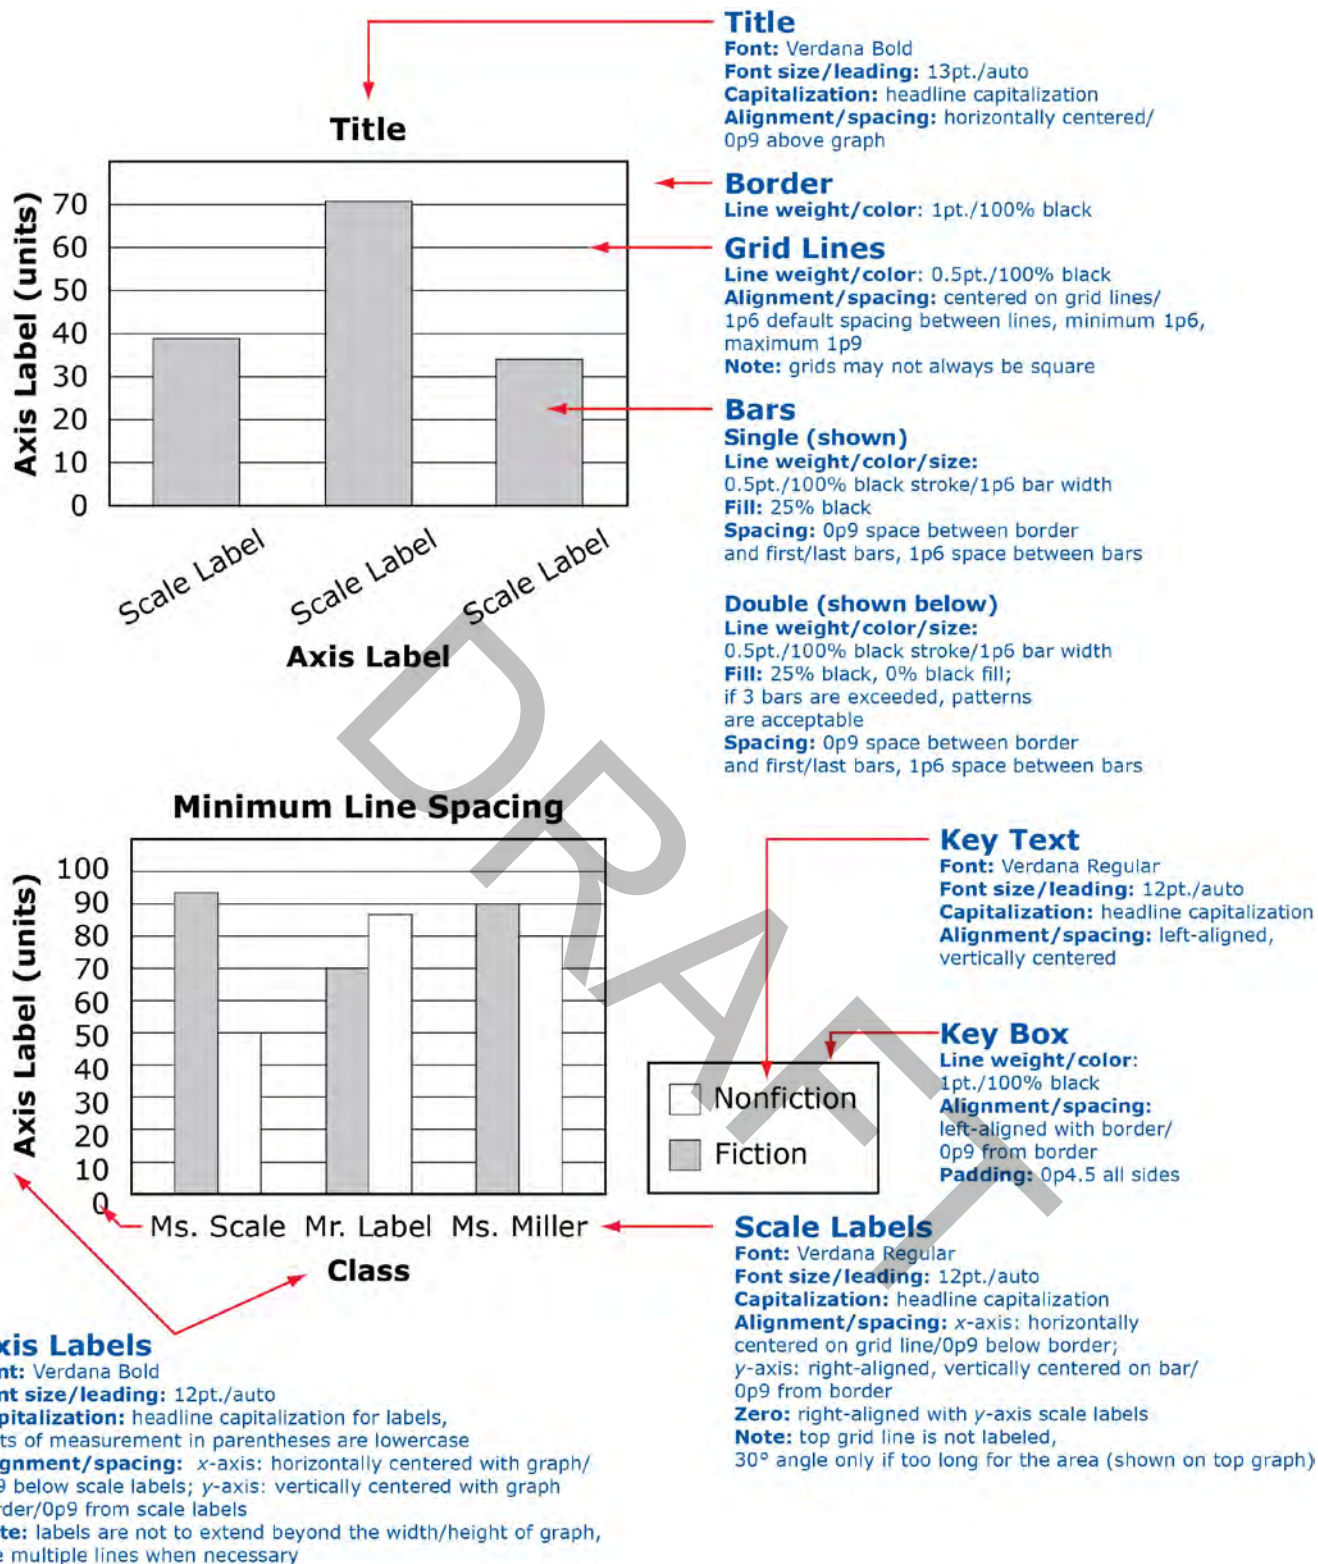

art titles

Titles are included on each piece of art only when needed.

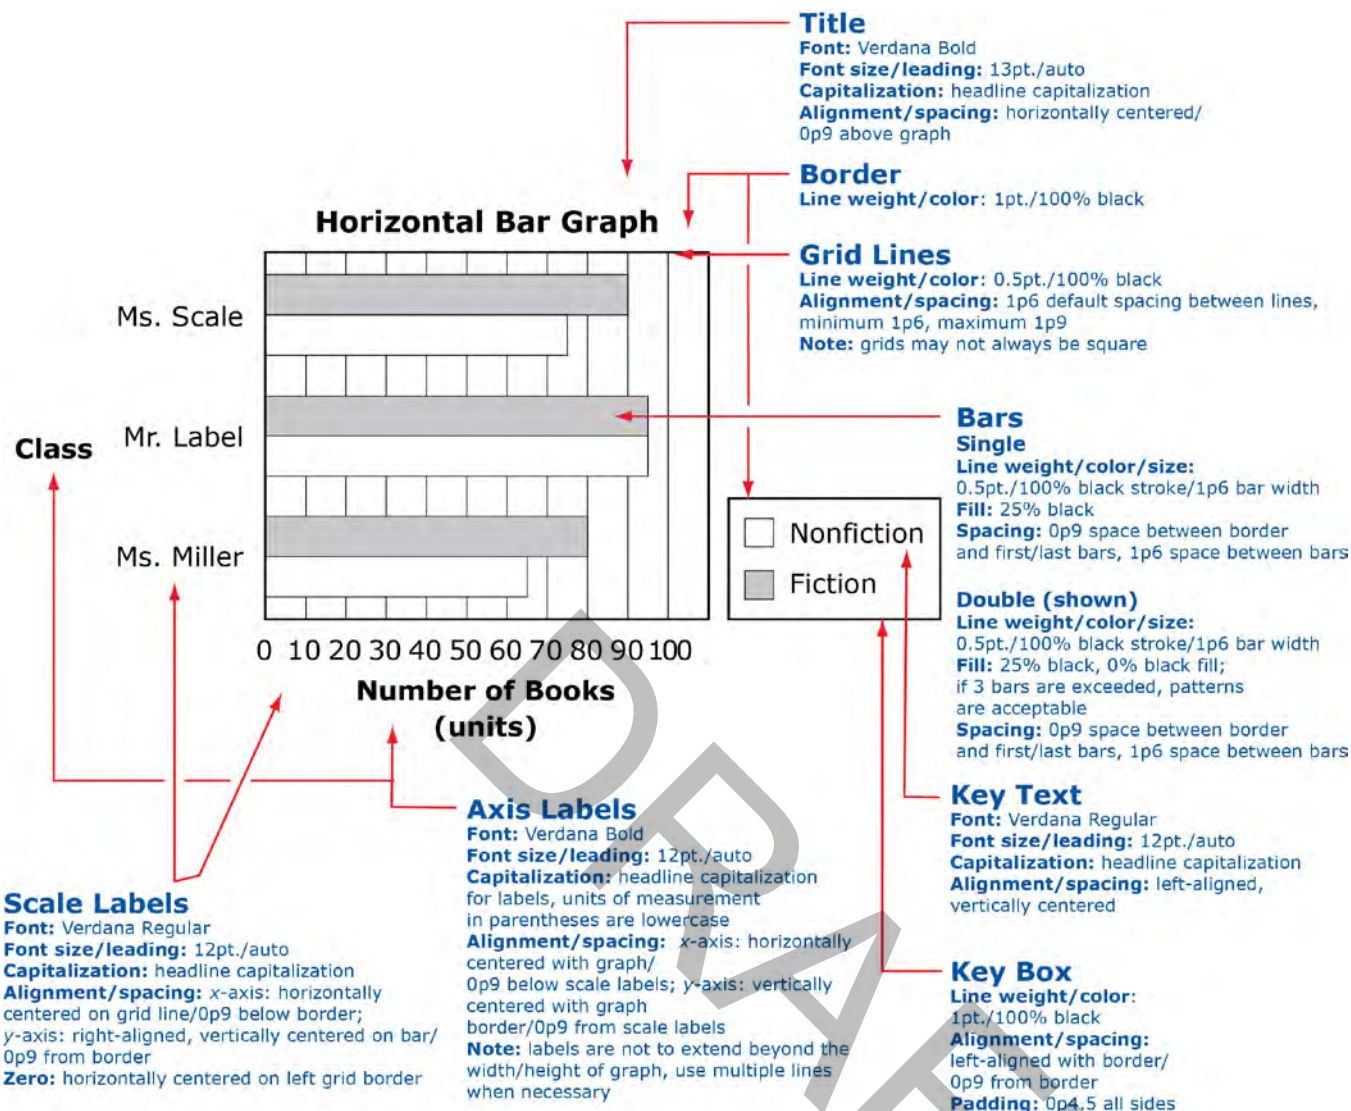

**bar graphs**

The use of interior grid lines depends on the data being represented.

See [abbreviations](#) in Language Requirements.

Box Plot_PARCC.eps

captions

Captions created for photos or other artwork should contain information that is not in the passage or other text so it is known where students read the information.

Alaska mountains

Alaska vacations are becoming more popular.

Photo Caption

Font/color: Verdana Bold/100% black

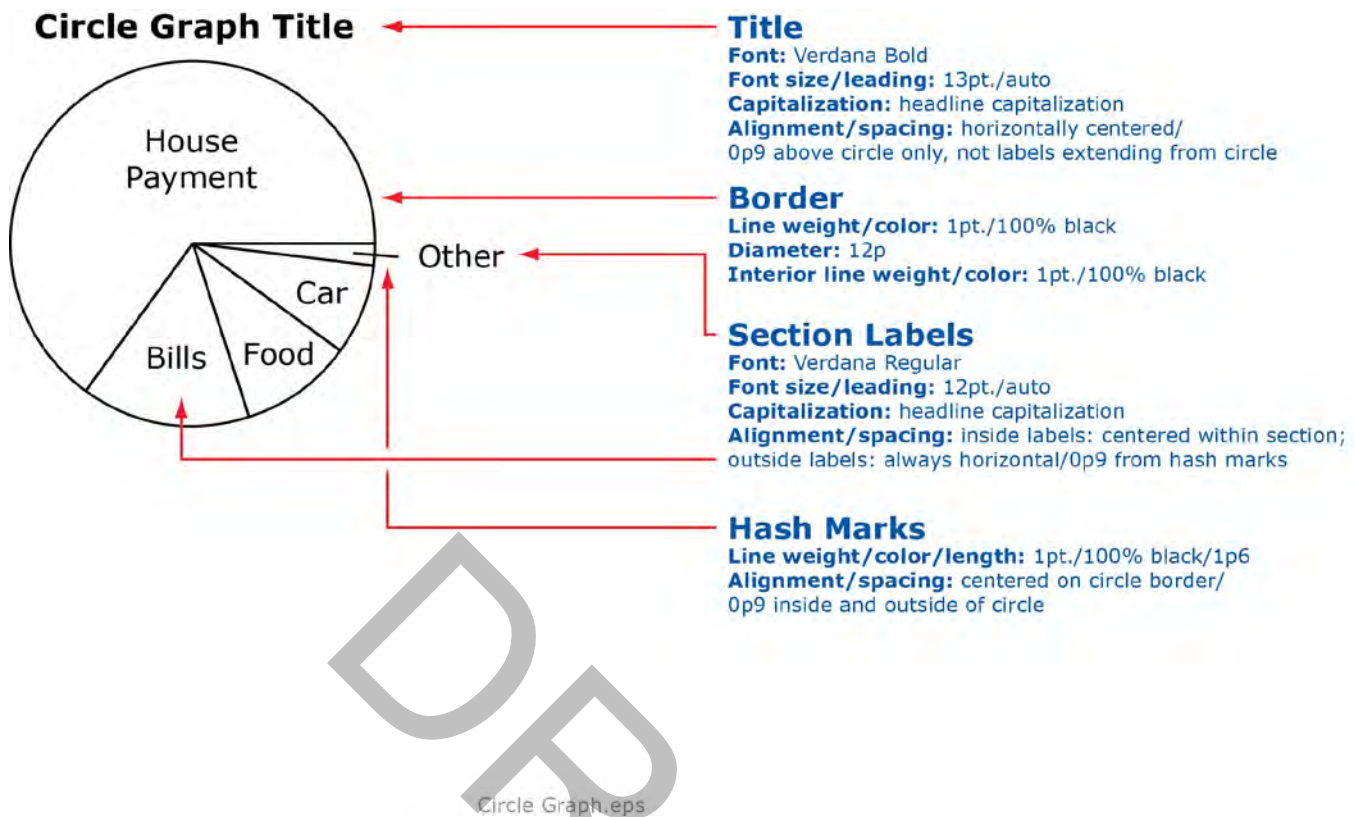

Font size/leading: 11pt./auto

Capitalization/punctuation: lowercase, except for proper names and nouns/no punctuation, except for complete sentences

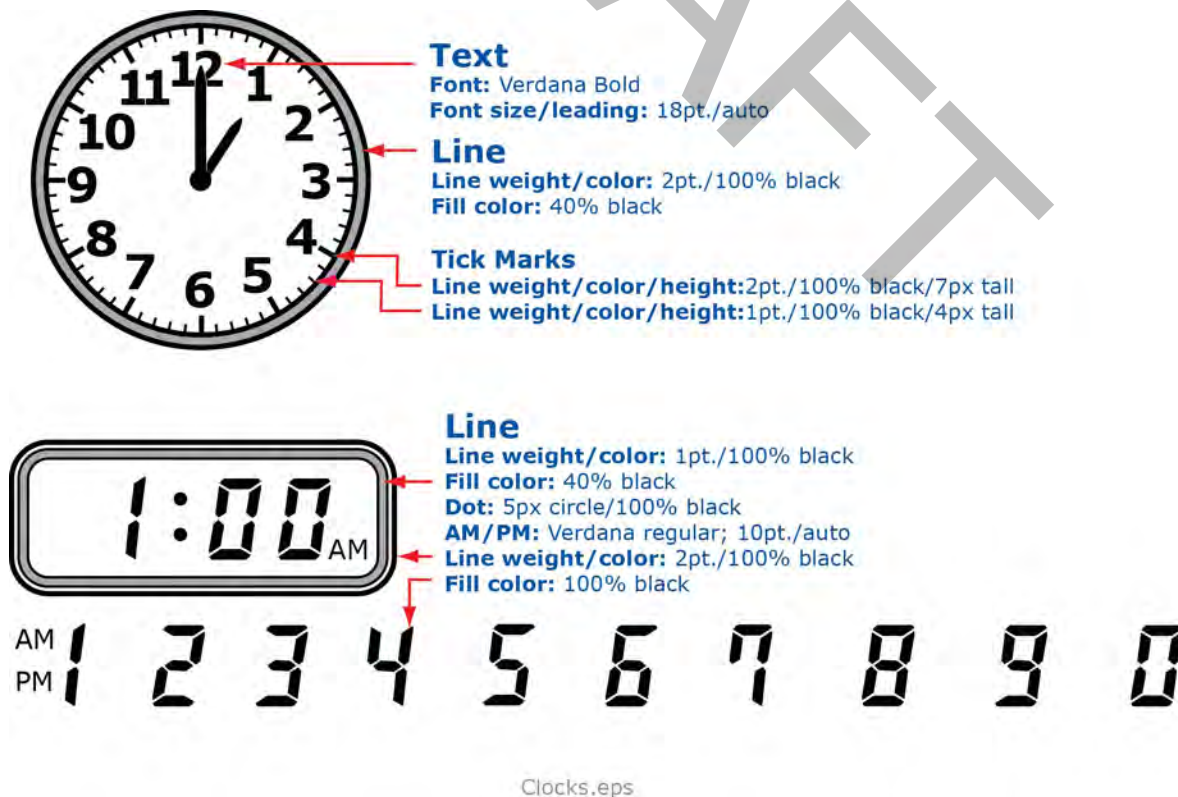

Alignment/spacing: horizontally centered, left-align when caption is a sentence/0p9 below photo

Note: wrap text when longer than photo width

circle graphs

clocks

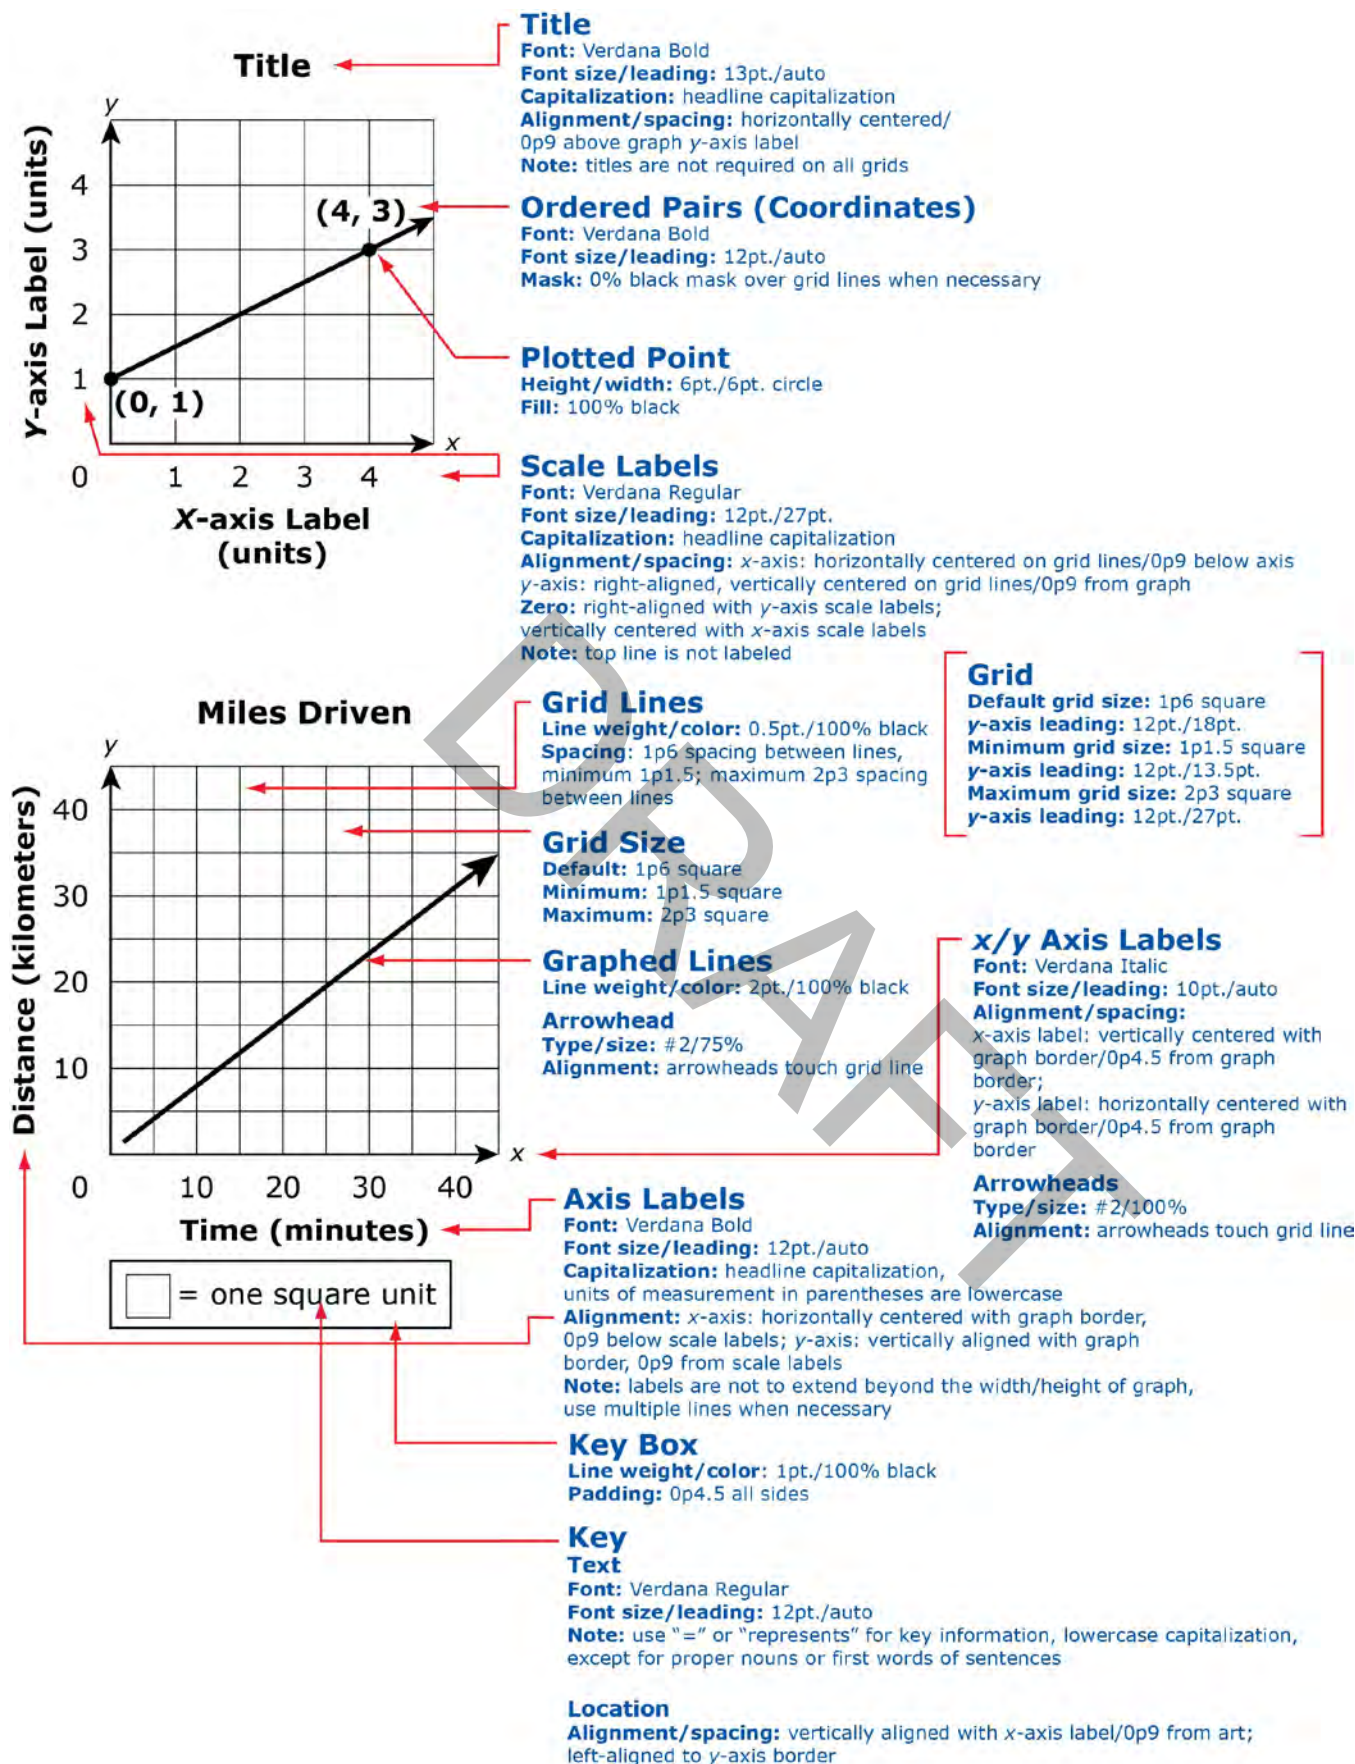

congruency marks

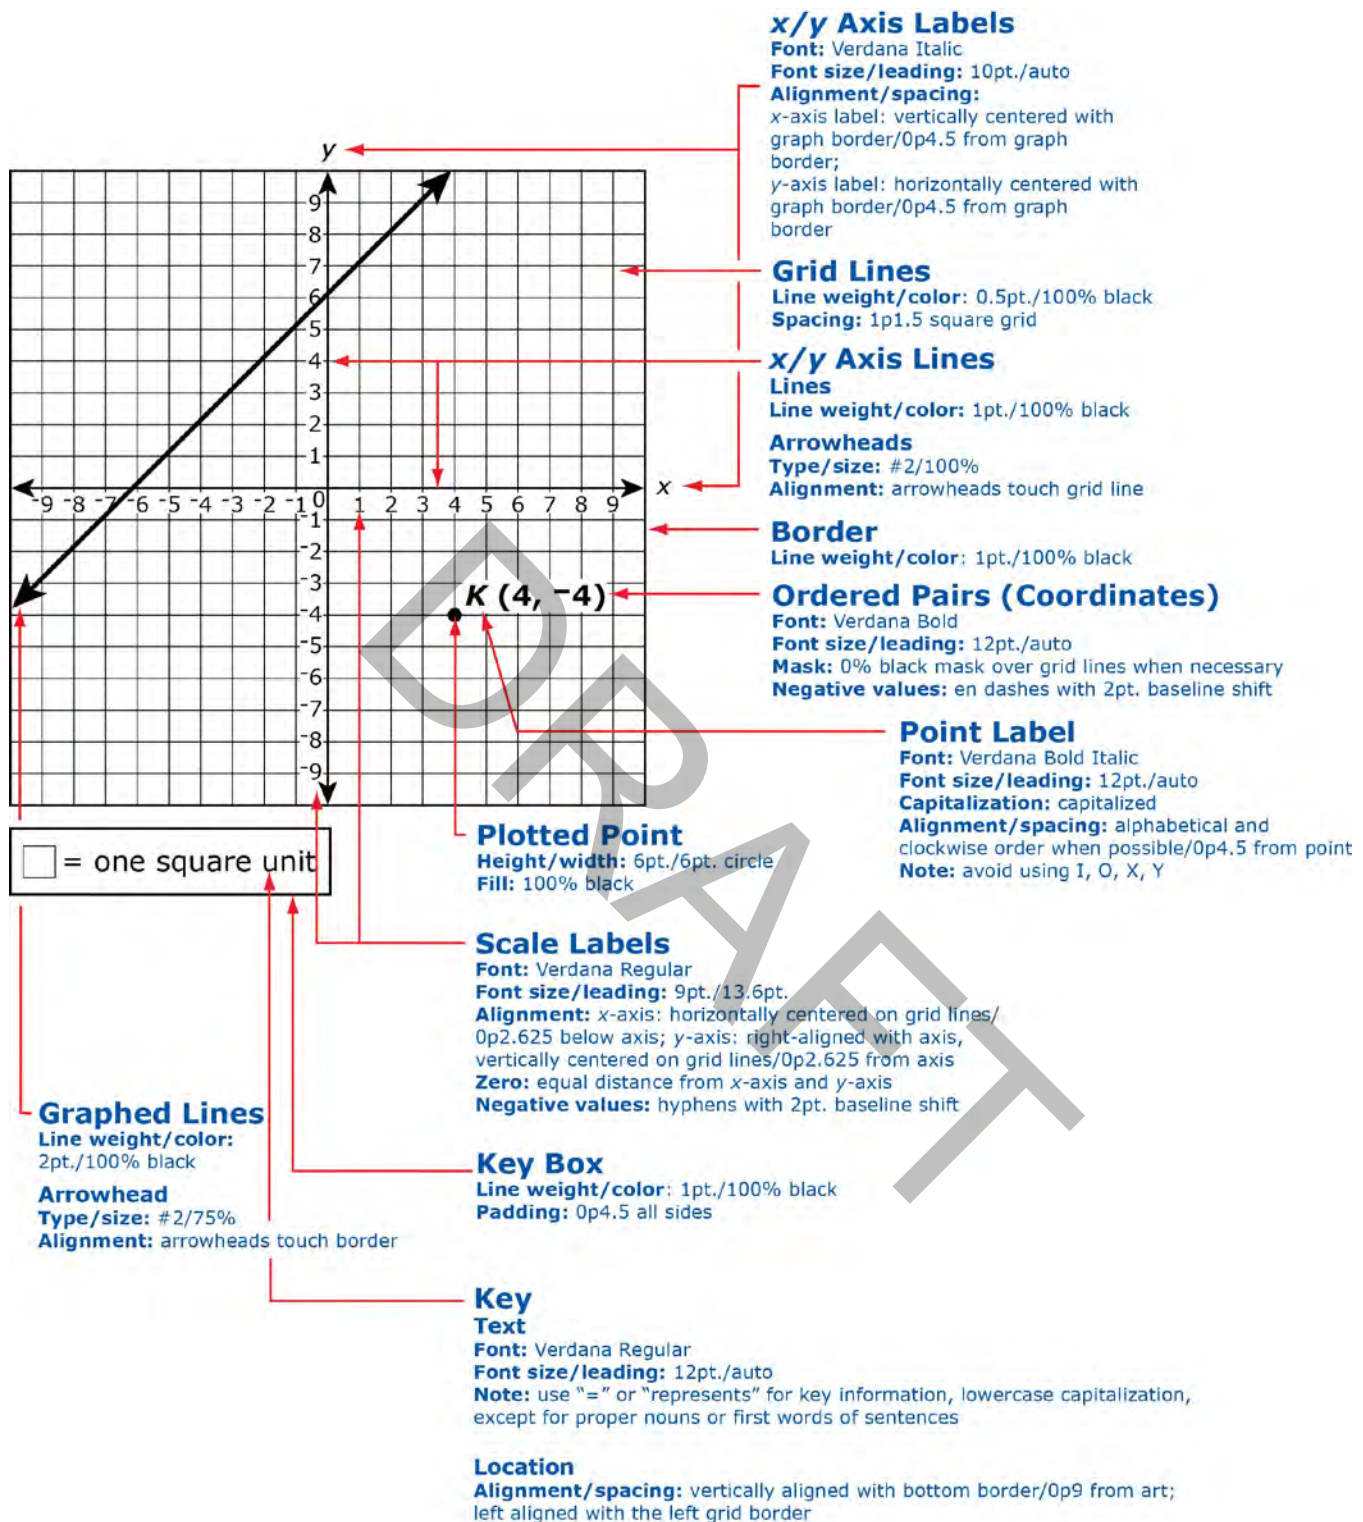

coordinate grid (coordinate plane), 1 quad

Titles are not required on all grids. See [scale break](#) in this section.

figure labels

The language used is Figure 1, Figure 2, Figure 3, etc.

Retain the capitalization of Figure in text. e.g., The safety equipment in Figure 1 is what a student should wear when performing a science experiment.

See [art labels](#) in Art Requirements and [figure labels](#) in Language Requirements.

**flow charts**

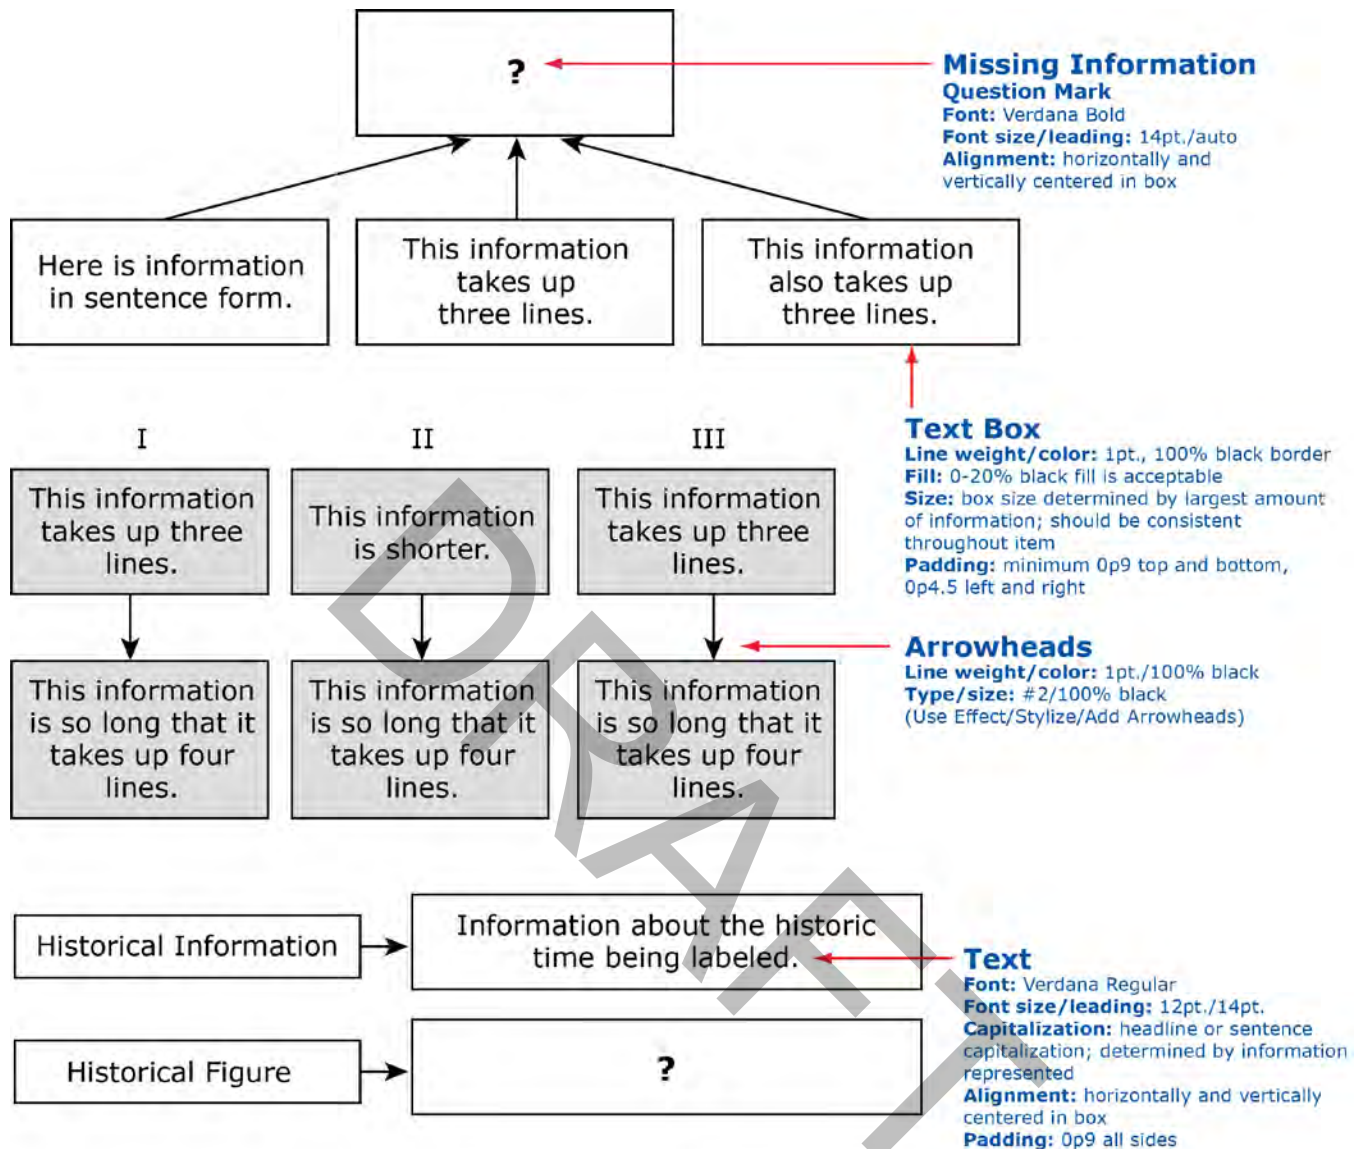

See [graphic organizers](#) in this section.

geometric shapes

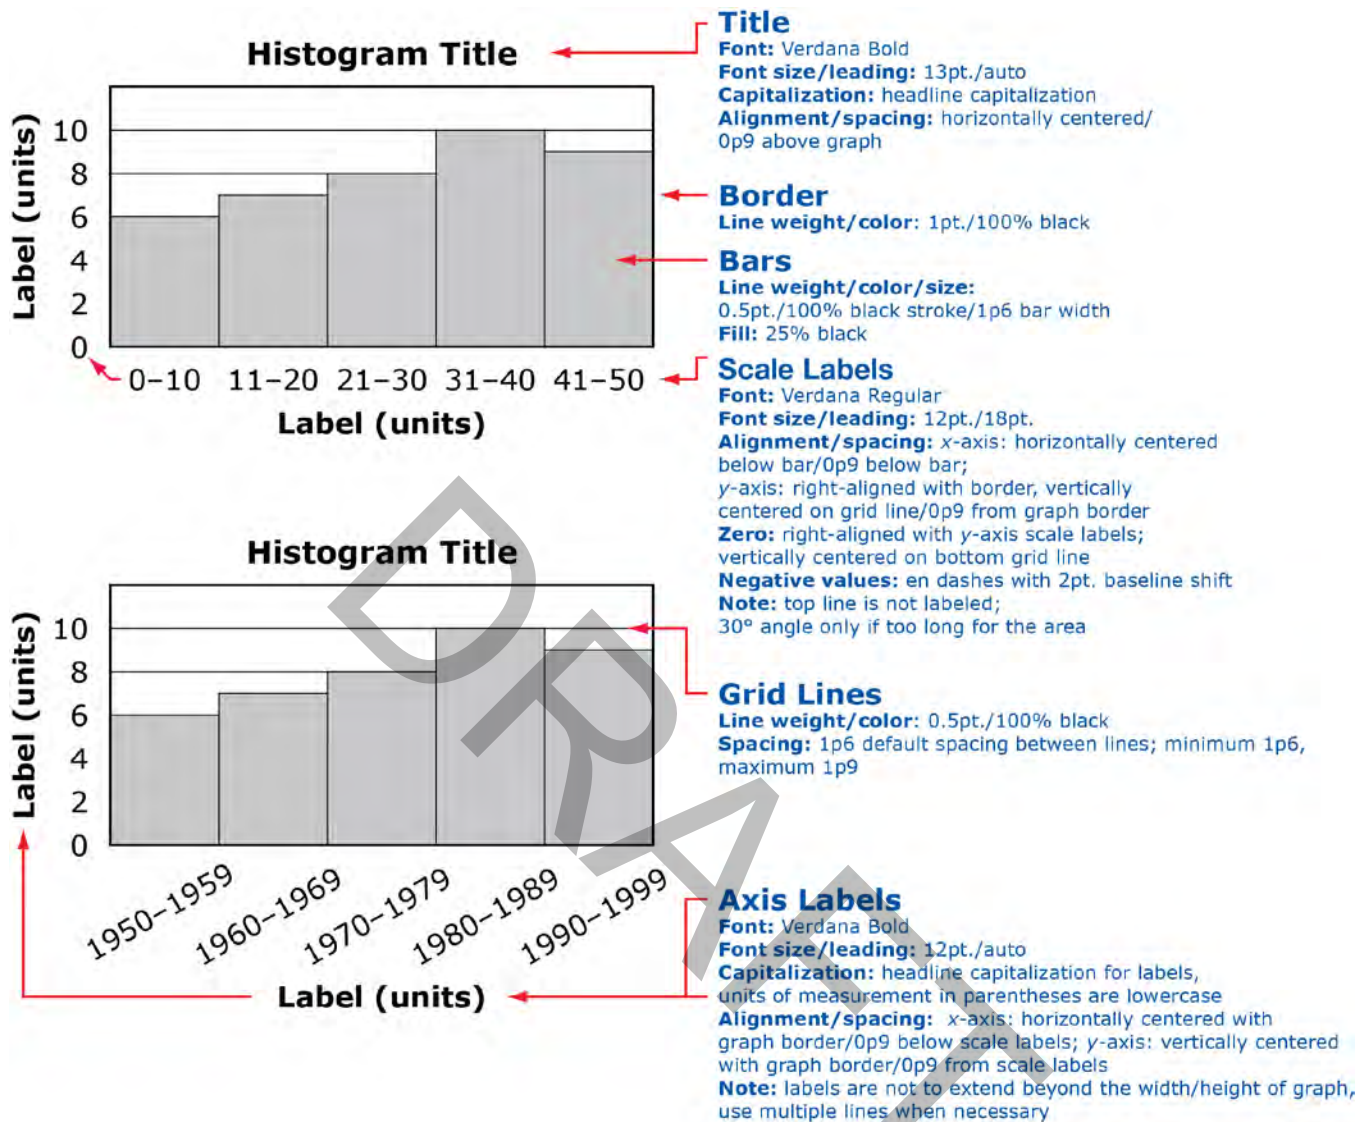

Three-dimensional geometric shapes should show hidden lines as dashed lines.

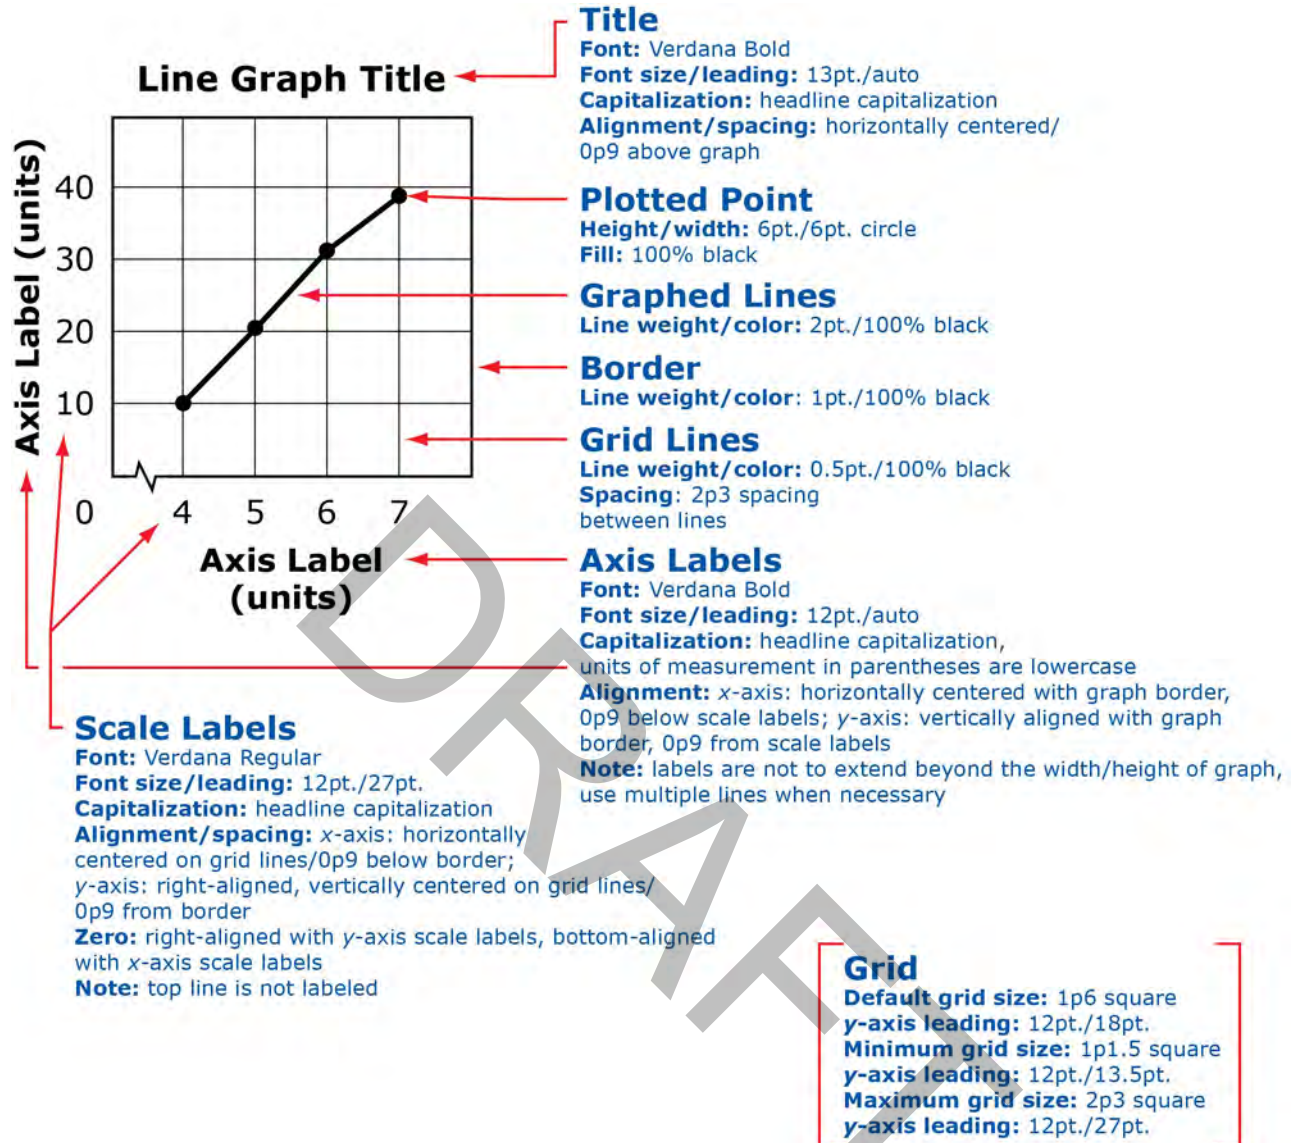

graphic organizers

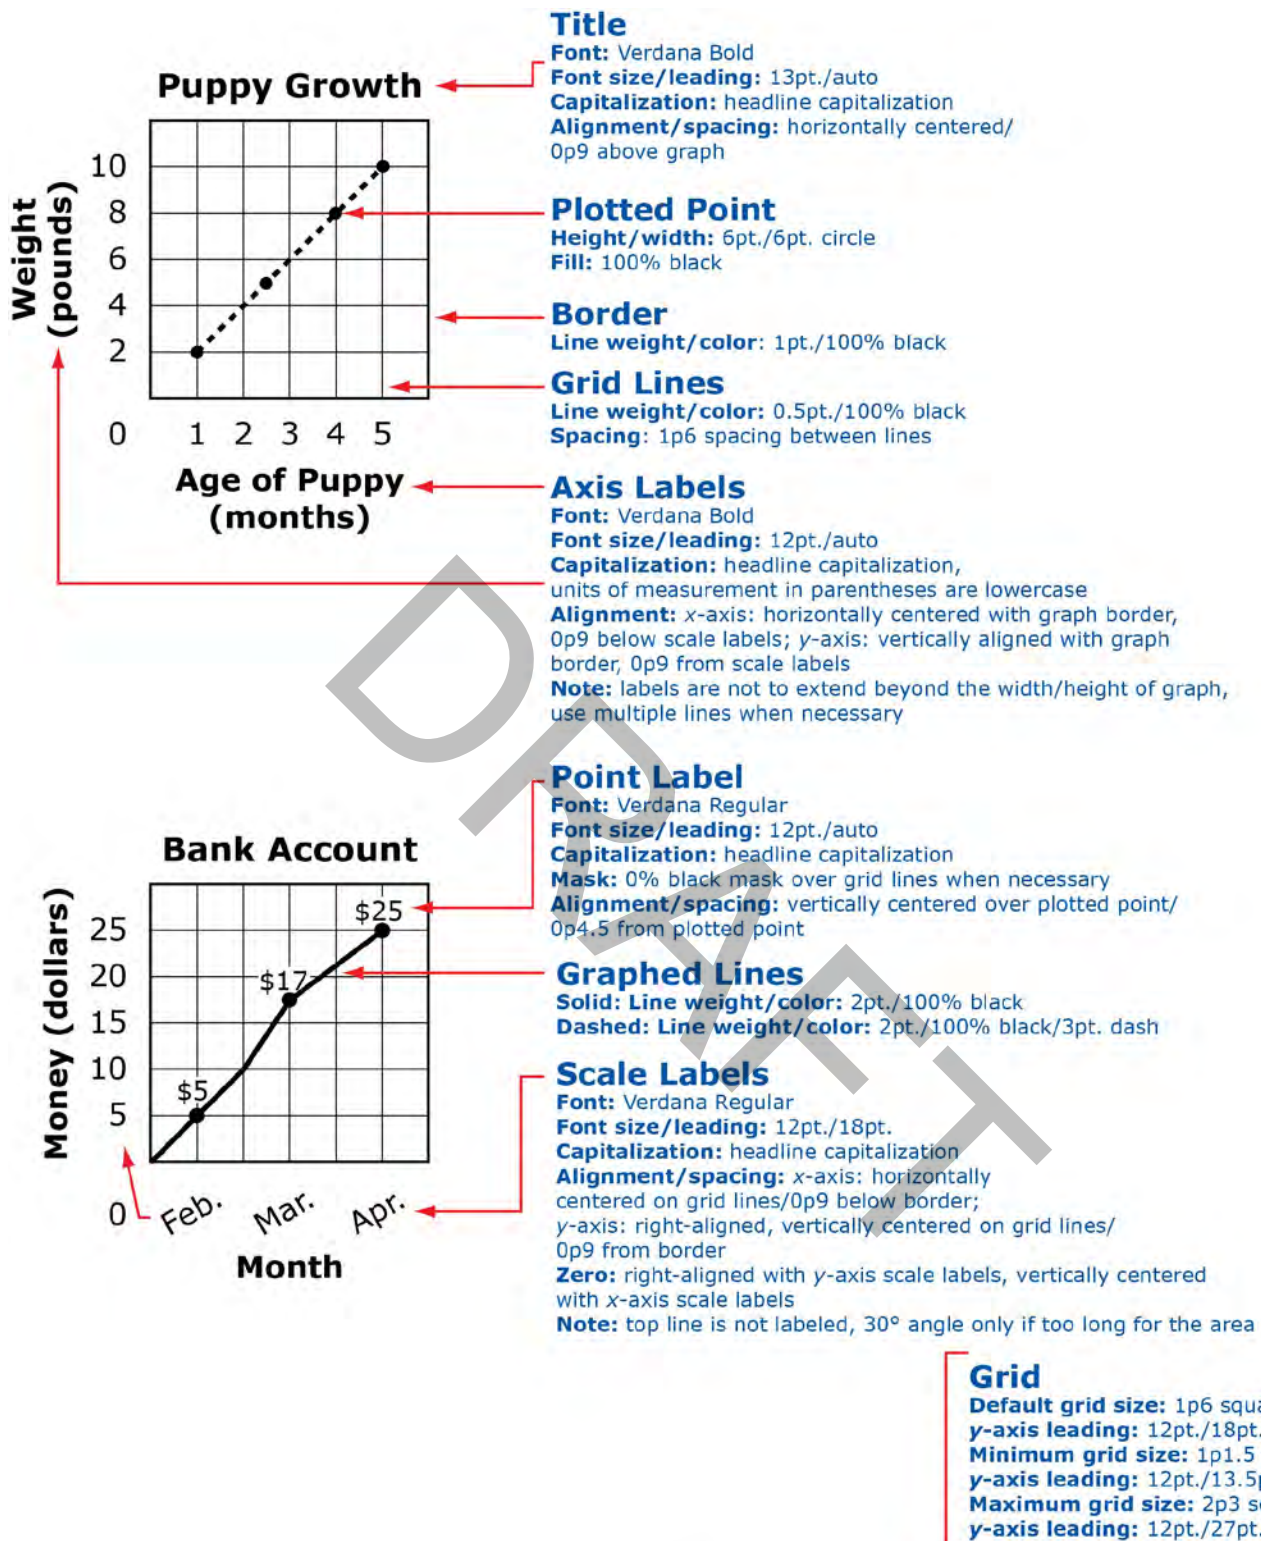

histograms

line graphsSee [scale break](#) in this section.

Line Plot.eps

line weights

Use 1pt. lines for major line work.

The minimum is 0.50pt. line weight for details in line art.

The minimum is 0.26pt. line weight for fine details in illustrations only. Illustrations may also include line weights between 0.26pt. and 0.50pt. For all other artwork, use 1pt., 0.75pt., 0.50pt., or 0.26pt.

(line weights.eps)

lines

See [dashed lines](#) in this section.

maps

A legend will be included when the map contains patterns, shading, or symbols.

All maps should have a compass rose. When a legend is not included, the compass rose default location is the lower right corner of the map.

If default locations are unavailable for the legend or compass rose, the next logical open space will be used.

See [design fills and patterns](#) in this section.

**Compass Rose**

Alignment/spacing: bottom-aligned with bottom border of map/0p9 right of map

Note: may be placed in next logical location if necessary

Map 1.eps

measurement brackets

Measurement brackets are used when necessary in art.

money

According to the **US** Secret Service Web site, paper money illustrations must be at least 75% of the original size or smaller or 150% of the original size or larger than real money if the illustrations look like real money. Coin illustrations can be exact replicas because there is no concern about counterfeiting. See [money](#) in Language Requirements.

Currency is 70% of original size**Coins are 100% size**

passages, nonstandard

Nonstandard passages such as Web pages, tables of contents, bibliographies, etc., are created based on art templates.

pattern (shape)

A pattern with shapes is shown at least three times so the pattern is established.

Use a blank line to indicate the next elements in the pattern that the student is asked to identify (number of blank lines equals the number of next elements asked for in the item).

See [sequences and patterns \(number\)](#) in Layout Requirements.

Venn diagrams

Language Requirements

a.m., p.m. Lowercase the letters and include periods. The exception is how a.m. and p.m. are shown in clocks.

See [time](#) in this section.

abbreviations

Abbreviations must be consistent within text. Spell out words in the stem, but abbreviations may be used in art and answer choices if the words have been spelled out in the stem. e.g., cm or ft would be acceptable in art.

Some commonly known abbreviations, such as DNA, may be used on first reference without a spelled-out reference preceding the abbreviation.

Spell out television, versus, city names, and people's names on first reference in text. e.g., television instead of TV, versus instead of vs., New York City instead of NYC, John F. Kennedy instead of JFK.

Use periods for only "in.", "mi.", and "oz."

Abbreviations are used for English units, metric units, and the International System of Units.

See [bar graphs](#); [circle graphs](#); [coordinate grid, 1 quad](#); [histograms](#); [measurement brackets](#); [side labels of geometric figures](#); [tables](#) in Art Requirements.

days of the week

In items that do not have adequate space for spelling out terms along a graph axis, for example, use abbreviations for days of the week.

| | |
|----------------|-----------------|
| Sun. Sunday | Thurs. Thursday |
| Mon. Monday | Fri. Friday |
| Tues. Tuesday | Sat. Saturday |
| Wed. Wednesday | |

months

In items that do not have adequate space for spelling out terms along a graph axis, for example, use abbreviations for months.

| | |
|--------------|-----------|
| Jan. January | July July |
|--------------|-----------|

| | |
|---------------|-----------------|
| Feb. February | Aug. August |
| Mar. March | Sept. September |
| Apr. April | Oct. October |
| May May | Nov. November |
| June June | Dec. December |

states

When appropriate, the two-letter postal code should be used as the abbreviation for a state name. See [state names](#) in this section.

| | |
|-------------------------|-------------------|
| AK Alaska | MT Montana |
| AL Alabama | NC North Carolina |
| AR Arkansas | ND North Dakota |
| AZ Arizona | NE Nebraska |
| CA California | NH New Hampshire |
| CO Colorado | NJ New Jersey |
| CT Connecticut | NM New Mexico |
| DC District of Columbia | NV Nevada |
| DE Delaware | NY New York |
| FL Florida | OH Ohio |
| GA Georgia | OK Oklahoma |
| HI Hawaii | OR Oregon |
| IA Iowa | PA Pennsylvania |
| ID Idaho | RI Rhode Island |
| IL Illinois | SC South Carolina |
| IN Indiana | SD South Dakota |
| KS Kansas | TN Tennessee |
| KY Kentucky | TX Texas |
| LA Louisiana | UT Utah |
| MA Massachusetts | VA Virginia |
| MD Maryland | VT Vermont |
| ME Maine | WA Washington |
| MI Michigan | WI Wisconsin |
| MN Minnesota | WV West Virginia |
| MO Missouri | WY Wyoming |

MS Mississippi**above**

Avoid using the term *above* to refer students to information or art.

See [below](#) and [the following](#) in this section.

acknowledgments

Use the specific acknowledgment language requested/required by the content owner.

Passages: If the owner does not request or require specific language, the standard credit line will be: "Passage Title" by Author's Name from NAME OF SOURCE DOCUMENT, Publisher. Copyright Information. (if not public domain)
e.g.,: "Why I Need the Birds" by Lisel Mueller from ALIVE TOGETHER by Lisel Mueller, Louisiana State University Press. © 1996.

Photographs: If the owner does not request or require specific language for the credit line on the acknowledgments page, the standard credit line for photographs in the acknowledgments section will be: "Photo Title from Source Information" by Photographer's Name or Rights Holder's Name from NAME OF SOURCE LOCATION. Copyright **Information**. (if not public domain)
e.g.,: "Asian Elephant" by CORBIS from Serengeti Collection. © 2007.

If the photographer or rights holder does not require specific language for the photo credit, the standard photo credit language next to the photo will be: Photographer's Name or Rights Holder's Name, Photo Title from Source Information.

See [photo credits](#) in Art Requirements.

acronyms

Follow Chicago Manual of Style, 16th edition, and Merriam-Webster's Collegiate Dictionary, 11th edition, for guideline if not specially documented in the PARCC Editorial Style Guide.

Most acronyms will be spelled out on first reference and immediately followed by the acronym in parentheses, e.g., computer-generated images (CGI).

| | |
|--------------------------------|--|
| active voice | The default is to use active voice. When appropriate based upon context, use passive voice. |
| addresses | <p>When used in fictitious context, use mock addresses that do not correspond to a living person, or to a real place (e.g., 123 Example Lane, Example, IA 12345).</p> <p>Mock phone numbers are also used (e.g., 555-0158).</p> |
| afterward | Do not include an s at the end of the word. |
| ages | <p>Follow Chicago Manual of Style, 16th edition.</p> <p>e.g., A six-year-old enjoys recess. The child is six years old.</p> <p>See numbers in this section to determine whether a number should be written as a numeral or spelled out.</p> |
| answer options | |
| <i>capitalization</i> | <p>In open-stem items, the first word in each answer option is lowercase and terminal punctuation is included at the end of each answer option.</p> <p>In closed-stem items, the first word is lowercase if the answer option is not a sentence unless the first word is a proper noun. Terminal punctuation is included only for sentences.</p> |
| <i>language</i> | All answer options may be written in parallel language, two answer options may be written parallel to each other and the other two parallel to each other, or they may all be different. |
| <i>units of measure</i> | When unit of measure labels are given in the stem, labels are not repeated in the answer options. Unit of measure labels appear one space after the number in answer options and other vertical lists. |
| apostrophes | Follow Chicago Manual of Style, 16th edition; Merriam Webster's Collegiate Dictionary, 11th edition; and Webster's Third New International Dictionary. |

plurals: Add *s* to capital letters used as words (e.g., three Rs), numerals used as nouns (e.g., 1960s), and abbreviations (e.g., HMOs).

Add *'s* to lowercase letters (e.g., p's and q's).

possessives: The possessive form of most singular nouns is made by adding *'s*.

The possessive form of plural nouns is made by adding *'* except for some irregular plurals that do not end in *s* (e.g., children's).

If the text cannot be rephrased or it is clearer with an apostrophe, add *'* to singular nouns ending in *s* or the name of a place, organization, or publication in plural form ending in *s* but the entity is singular (e.g., the United States' role in . . . ; Coral Gables' mayor said . . .).

BC, AD

Capital letters without periods: BC and AD.

With dates, BC follows the date and AD precedes the date. (e.g., 150 BC; AD 975.)

backward

Do not include an *s* at the end of the word.

base words

A base word is a word that can add a prefix, a suffix, or both to become a derivative word. For instance, the word *beauty* is the base word of *beautiful*. The term *base word* should not be used synonymously with *root word*.

See [root](#) in this section.

below

Avoid using the term *below* to refer students to information or art.

See [above](#) and [the following](#) in this section.

boxed text

The types of text boxed in stems include excerpts, quotations from a stimulus, and pull quotes.

Math: Conditional statement text is boxed.

brackets

Synonyms for difficult words are placed within brackets after the difficult word. (e.g., "I never thought about numbers; the Americans were invincible [unbeatable] in my opinion." Joseph Plumb Martin, 1776)

bulleted lists

Bulleted list text has the first word capitalized and a period at the end of each bulleted point when the text is a sentence.

Bulleted list text has the first word lowercased and no ending punctuation when the text is not a sentence.

Use all sentences or all phrases/clauses in the same bulleted list. Do not write a sentence for one bulleted point and a phrase or clause for another bulleted point in the same list.

See [bulleted lists](#) in Layout Requirements section.

capitalization***art text in item text***

Art text repeated in item text is lowercase unless the text is a proper noun or a [figure label](#).

headline-style

Capitalize the first, last, and all other major (nouns, pronouns, verbs, adjectives, adverbs, and some conjunctions) words in titles and subtitles. Lowercase the articles *the*, *a*, and *an*. Lowercase prepositions, regardless of length, except when they are used adverbially or adjectivally. Lowercase the conjunctions *and*, *but*, *for*, *or*, and *nor*. Lowercase *to* as preposition and also as part of an infinitive. Lowercase *as* in a grammatical function. Lowercase *per* in graphs.

sentence-style

Capitalize the first word and any proper nouns.

closed stems

A closed stem may be written either as a question or a command, depending on the item.

coin

Use *fair coin* rather than *coin* in probability items.

colons

The capitalization of the first word following a colon depends on the context.

The first word following a colon is lowercase when a colon is used within a sentence. (e.g., The shirt is available in three colors: red, blue, and green.)

The first word following a colon is capitalized when a colon introduces a speech in dialogue or an extract, a direct question, or two or more sentences. (e.g., Ashley has a

choice to make: She can eat lunch with a friend. She can eat lunch with her brother. Or she can eat lunch alone.)

commas

Serial commas are used. e.g., The wind blew leaves, sticks, and dirt into the air.

Include a comma after an introductory participial phrase unless a verb immediately follows the phrase. (e.g., Excited by the news, the student began talking about the upcoming field trip.)

Introductory adverbial phrases may use a comma after them, but a comma is not necessary unless misreading is likely. Longer adverbial phrases are more likely to use a comma than shorter adverbial phrases. Do not include a comma if a verb immediately follows the phrase. (e.g., To Sue, Florida was a vacation destination.)

constructed-response items, stem language

Constructed-response stems may be written as questions or commands, depending on the item.

Default for constructed-response items with multiple parts is for stems to be parallel. See [parts](#), constructed-response items in Layout Requirements.

content-specific directions

Paper: See [content-specific directions](#) in Layout Requirements.

Online: See the content-specific directions entry in the Layout Requirements section of the PARCC Computer-Based Testing Style Guide.

contractions

Do not use contractions unless contractions are being assessed. In passages, limited use of contractions is OK.

data

Generally the term *data* is a plural noun and takes a plural verb. Rewrites are recommended in those cases where there may be some confusion with the singular usage.

dates

Dates are written in month, day, and year order. (e.g., July 4, 2004) Centuries are spelled out. (e.g., twenty-first century)

Decades may be spelled out or written as numerals. (e.g., sixties or 1960s)

The century must remain when an en dash is used to show numeric continuity in dates. (e.g., 1950–1960)

See [en dashes](#) in this section.

day The term *day* refers only to a 24-hour period.

dictionary items See [dictionary items](#) in Layout References.

dictionary references Webster's Third New International Dictionary and Merriam-Webster's Collegiate Dictionary 11th edition are the default dictionaries. The online version of the international dictionary is available by subscription only. See [style reference](#) in this section.

directions Compass points and terms are lowercase if simply noting direction. (e.g., pointing toward the south or a west wind.)

Geographic directions may be capitalized depending on usage. (e.g., East Coast, the Northwest, the South.)

e-mail Use a lowercase *e* and hyphenate the term *e-mail*.

Earth Capitalize *Earth* when referring to the planet. Do not include *the* before Earth.

ellipses Ellipses **are** used to indicate the omission of a word, phrase, line, paragraph, or more from quoted material.

Three ellipsis points are used to indicate suspended or interrupted thought or a quoted sentence that is deliberately left grammatically incomplete. (e.g., Everyone knows that the Declaration of Independence begins with the sentence "When, in the course of human events . . .")

Four ellipsis points (a period followed by three ellipsis points) are used to indicate the omission of the end of a sentence, unless the sentence is deliberately incomplete. Four ellipsis points are also used to indicate the omission of material immediately following the period (or first ellipsis point). Text preceding and, generally, following the four dots should be grammatically complete sentences. See the example.

Complete text: The lunch menu contains three options: a sandwich, pizza, or tacos. Students may choose a different option each day. Each option comes with a cup of fruit and

a carton of milk. The options on the lunch menu change weekly.

Shortened text: The lunch menu contains three options. . . . Students may choose a different option each day. . . . The options on the lunch menu change weekly.

ELA: Ellipses are used when they appear in published passages.

See [ellipses](#) in the Layout Requirements section.

em dashes

An em dash (—) may be used in text to denote an abrupt break in thought or set of explanatory elements rather than using parentheses, commas, or a colon. Do not use an em dash within or immediately following another element set off with an em dash. See Chicago Manual of Style, 16th edition, entries 6.82–6.91.

Do not include a space before or after an em dash unless otherwise noted. (e.g., He explained his theory—a theory that he believed would bring peace to the nation.)

emphasis words

Emphasis words are used in passages and stems.

Emphasis words include:

- best
- least
- most
- not
- except
- most likely
- and (math)
- at least (math)
- may (math)

See [emphasis words](#) in the Layout Requirements section.

en dashes

Use an en dash for number sequences (3–2–1), to replace the word *to* or *through* in numeric continuity (e.g., 2003–2012), and to indicate an ongoing number range (1924–). See Chicago Manual of Style, 16th edition, 6.78–6.81 for more information. Do not include a space before or after an en dash unless otherwise noted.

| | |
|---------------------------|---|
| European spellings | If a word in a published passage is spelled according to European rules, the word should not be changed. |
| figure labels | The language used is Figure 1, Figure 2, Figure 3, etc. Do not use letters to label figures. See figure labels in Art Requirements. |
| footnotes | See footnotes in Layout Requirements. |
| hyphens | Use hyphens to separate numbers that are not inclusive (e.g., phone numbers), letters when a word is spelled out by letters (e.g., b-a-s-k-e-t), URLs, e-mail addresses, and compound words. |
| Internet | Capitalize the word <i>Internet</i> . |
| mathematics | Use either <i>mathematics</i> or <i>math</i> when referring to the subject/content. |
| money | <p>Usually use the decimal and 2 digits after the decimal. (e.g., \$5.00) However, to avoid the serial decimal point and period, a sentence may be written “Add \$5 and \$8.”</p> <p>Grade 3: It is OK to use ¢ for one- and two-digit amounts. (e.g., 5¢, 75¢)</p> <p>Grades 4–HS: Use the \$ for formality and clarity even for amounts less than \$1.00.</p> <p>When amounts greater than or equal to \$1.00 and amounts less than \$1.00 are used in an item, all amounts should be written with \$ instead of mixing \$ and ¢.</p> <p>See money in Art Requirements.</p> |
| Moon | When referring to Earth's Moon, capitalize Moon except when discussing phases or shapes of the Moon: half-moon, full moon. |
| names | The default is to include Mr. and Ms. in adult references; however, Mrs. and Miss may be used in historical and literary context. A person's first and last name should be stated in the first reference to a historical figure, and the last name only may be used on subsequent references. Children may be referred to by first name only. |

Previously published context should not be altered to fit this default.

Native American, Native American groups

The specific name , e.g., Navajo, Cherokee, Iroquois, etc., is preferred. Use *Native American* rather than *American Indian*.

negative sense

Try to avoid using the negative sense *not* and *never*.

numbers

Numbers between one and one hundred and round numbers (three hundred) should be spelled out. Use numerals for other numbers (101, 450). Exceptions to numbers being spelled out are numbers in math items, lists of materials, graphs, tables, and measurements.

When two numbers appear together, generally spell the first one and use a numeral for the second one. (e.g., There are two 12-foot pythons.) But if the first of two numbers is a one, do not include it. (e.g., 8-inch piece of string (not one 8-inch piece of string))

For numbers of four or more digits, use the comma except in years, address numbers, ZIP codes. (e.g., 1,050; 25605 First Street)

ELA: Numerals are used for paragraph references in an item (e.g., paragraph 9).

Math: Use numerals rather than spelling out numbers. However, do not use numerals at the beginning of a sentence or where the numeral/number is nonessential to the solution of the problem. (e.g., Four blocks from the house we found 3 kittens and 2 puppies in a box. How many animals were there in all?) Note that the number is spelled out at the beginning of a sentence and the student is not confused by using the unnecessary identifier of “4 blocks,” which could make the student believe this number is a necessary part of finding the solution to the problem being presented.

decimals

A leading zero (e.g., 0.5) is included for all decimals unless the number is a monetary value that uses a ¢. (e.g., 25¢)

number cube

Use *number cube*, not *dice*. Items with number cubes should clarify the number cube has faces. Use the language “a cube with sides numbered 1–6.”

ordinals

Ordinals can be written as words (e.g., third) or numerals (e.g., 3rd), but the format needs to be consistent throughout an item.

open stems

Open stem items have no punctuation at the end of the stem.

passages

A passage is one kind of stimulus.

ELA: Use the term *passage* when genre identification is a skill being tested. When a more specific term, such as *autobiography*, needs to be used, use the specific term throughout the related items. Excerpts will be identified as “Excerpt from (book title).”

author, poet vs. narrator, speaker

The narrator or speaker is not the author or poet. Narrators and speakers are characters created by authors and poets.

author byline

The word *by* precedes the author’s name.

Do not include a byline if the author is not identified or if the passage is commissioned.

ellipses

See the [ellipses](#) entry in this section.

pronunciations

Pronunciations of words should appear in a passage if the pronunciations appear in the original published version.

subheadings

Subheadings may be used before the first and last paragraphs in a passage.

When subheadings are written in items, retain the headline capitalization. Do not put the subheading in quotation marks.

See [subheadings](#) in the passage entry in Layout Requirements.

percent

Percents are written as numerals (e.g., 2%).

Do not use MathType to write percents unless it is a negative number; then write the negative sign, number, and percent sign in MathType.

See [percent](#) in the Layout Requirements section.

| | |
|----------------------------|---|
| permissions | See acknowledgments in this section. |
| poem | Use <i>poem</i> to refer to poems. |
| point of view | The default point of view in items is third person. (e.g., Do not use “me,” “I,” “we,” “they”; use “The student,” etc.) |
| probability | Use the terms <i>random</i> or <i>without looking</i> when appropriate in probability items so it is clear something is not selected purposely. |
| quotation marks | <p>Use the term <i>quotation</i>, not <i>quote</i>.</p> <p>Quotations referred to as quotations must be direct quotations from the passage with no paraphrasing.</p> <p>Dialogue is enclosed in quotation marks, except in plays.</p> <p>Scare quotes are rarely used.</p> <p>See passage titles in titles in Layout Requirements.</p> |
| ratios | A ratio can be written as a fraction, with a colon, or with the term <i>to</i> . Write all ratios in the same format throughout an item unless ratio style is being assessed. (e.g., a to b, a/b, or a:b. Use “3:1” to show a 3 to 1 ratio.) |
| reading level | <p>Language used in items will be appropriate for the grade level being assessed. Subject-specific terminology may be an exception to the reading level.</p> <p>When terms in standards are above grade level and are not appropriate to use at the grade being assessed, content specialists will use grade-level appropriate terminology rather than the terms in the standards.</p> |
| reference materials | Reference materials used to support documentation must be authoritative. An authoritative source has a clear central editorial authority that oversees quality control. Authoritative sources generally: identify an author or authors (personal or corporate); are current; are free of bias or emotional rhetoric; contain references to supporting evidence; are from a known and established publisher/host; and may include reputable scholarly sources, university Web sites, and government Web sites. |

| | |
|-----------------------------------|--|
| root | <p>Use either the term <i>root</i> or <i>word root</i>. Since the majority of roots are not entire words (e.g., <i>tain</i> is the root of <i>contain</i>), the term <i>root words</i> should not be used.</p> <p>See base words in this section.</p> |
| state names | <p>State names are spelled out when following a city name (e.g., Miami, Florida; Tucson, Arizona) in text. See states in the abbreviations entry in this section.</p> |
| style reference | <p>Chicago Manual of Style, 16th edition is the default style reference. See dictionary references in this section.</p> |
| Sun | <p>Capitalize the word <i>Sun</i> when referring to the star in our solar system.</p> <p>Do not use the term <i>sun</i> for any other star.</p> |
| tens place, hundreds place | <p>Use <i>tens place</i>, <i>hundreds place</i>, etc., to refer to digits in decimals.</p> |
| tense | <p>The default tense for items is present, but this is item dependent.</p> |
| the following | <p>Avoid using <i>the following</i> to refer students to information or art.</p> <p>See above and below in this section.</p> |
| time | <p>Use <i>noon</i> and <i>midnight</i> instead of 12 p.m. and 12 a.m.</p> <p>Time should be written with the colon and minutes (:00) included after the hour when a more exact time is also included in the context (e.g., 12:30 p.m. and 2:00 p.m. in the same item). If only whole hours are used in the context, do not include the colon and minutes after the hour (e.g., 1 p.m. and 2 p.m. in the same item).</p> <p>See a.m., p.m. in this section.</p> |
| titles and offices | <p>If a title precedes a person's name, the title is capitalized. (e.g., President Lincoln) If a title follows a person's name, the title is lowercase. (e.g., Abraham Lincoln, sixteenth president of the United States)</p> |
| toward | <p>Do not include an <i>s</i> at the end of the word.</p> |

trademarked names Only use trademarked names when those names are used in a published stimulus.

Trademarked names are adjectives; a noun must accompany a trademarked name. (e.g., Kleenex™ tissue)

See [trademarked names](#) in Layout Requirements.

unit of measure labels When a unit of **measure** is used in the stem, the same unit of **measure** label does not need to be repeated in the answer options.

United States, US The noun form is spelled out in text: United States. The adjective form is abbreviated without periods: US.

PARCC/Achieve: Please verify whether the abbreviation US may be used as necessary in art because of space limitations.

Web site, Web page Capitalize *Web* and spell these as two words: *Web site* and *Web page*.

DRAFT

Layout Requirements

angle labels See [point labels](#) in Art Requirements, [point labels](#) in Layout Requirements.

answer options See [item layout](#) in this section.

equations, expressions, inequalities

Equations, expressions, and inequalities are aligned by the equal/inequality sign.

See [equations, expressions, inequalities](#) in this section.

fractions See [alignment](#) in fractions and [order](#) in fractions in this section.

labels Verdana Bold, 12pt. with a period after each letter.

Use only A., B., C., D.

layout The default is to list answer options vertically. See [item layout 3](#) and [placement of art](#) in answer options in this section.

If answer options are in a backward N layout when the content goes to the Braille vendor, the options for Braille will be reordered into the standard Braille layout shown below:

| | |
|----|----|
| A. | B. |
| C. | D. |

leading See [item layouts 1](#), [3](#), [5](#).

When exponents are in answer options, the leading does not change. See [exponents](#) in this section.

order Answer options may be ordered shortest option to longest option or vice versa.

ELA: Answer options that are text from a passage should be in the same order the text appeared in the passage, unless that cues the correct answer.

placement of art

See [item layout 3](#) in this section.

art width maximum Print, one-column stem: 19p6

Print, two-column: 41p6

Print, one column stacked answer option art: 15p2

Print, two column stacked answer option art: 36p8

constructed-response items**parts**

Constructed-response items may have more than one part that students need to answer.

content-specific directions

See [content-specific directions](#) in Language Requirements.

Directions: Use the information provided to answer Numbers XX through XX.

Directions

Font: Verdana Regular

Font size/leading: 13pt./auto

Alignment/spacing: left-aligned/2p space after

degree symbol

Do not include a space between the degree symbol and the F or C. (e.g., 15°C or Temperature (°F))

When Celsius or Fahrenheit are spelled out, a space will be added between the degree symbol and the word. (e.g., 15° Celsius).

Use Symbol font for the degree symbol, not a superscript letter "o."

Do not use MathType for degree symbols unless the temperature written is a negative number; then use

MathType for the negative sign, number, and degree symbol.

There is no space between the numbers, degree sign, and “N” or “S.” East and west are longitudinal and south and north are latitudinal.

See [degree symbol](#) in MathType in this section.

dictionary items

The diagram shows two examples of dictionary entries in boxes. The first box contains: **word:** v. 1. first definition text text text text text text text here 2. second definition text text text text text here 3. third definition text text text text text here 4. fourth definition text. The second box contains: **word:** 1. v. first definition text text text text text text text here 2. *adj.* second definition text text text text text here 3. third definition text text text here 4. *n.* fourth definition text. Red arrows point from the first box to a callout titled 'Dictionary Entry' and from the second box to a callout titled 'Box'.

Dictionary Entry
Font: Definition word, colon, number and period: Verdana Bold
Font: Part of Speech: Verdana Italic
Font: Definition Text: Verdana Regular
Font size/leading: 12pt./16pt.
Alignment: left-aligned
Note: Part of speech is listed before numbers if only one part of speech, after number if multiple parts of speech

Box
Line weight/color: 1pt./100% black
Alignment: left-aligned, 2p6 left indent
Padding: 0p8 left and right, 1p top and bottom
Maximum width: 19p6 (20p item) or 41p6 (42p item)

ellipses

The format for ellipses is to include a space before and after each dot (. . .). See [ellipses](#) in the Language Requirements section.

emphasis words

Emphasis words are bold. See [font](#) in this section and [emphasis words](#) in the Language Requirements section.

equations, expressions, inequalities

Verdana 12pt. in MathType. In MathType, default spacing between characters will be used.

Vertical lists of mathematical equations and inequalities are aligned by the equal/inequality sign.

In the stimulus of an item, the default layout for an equation, expression, or inequality is on its own line and centered horizontally within item text.

See [equations, expressions, inequalities](#) in answer options in this section; [equations](#) in MathType, [expressions](#) in MathType, and [inequalities](#) in MathType in this section.

exponents

Exponents are written in MathType. The location of the exponent is the default location in MathType.

See [exponents](#) in MathType and [leading](#) in answer options in this section.

font

Verdana, 12 pt. is the font that will be used.

Verdana, 9 pt. is the minimum font size for maps, graphs, and art.

Large-print font is 150% of Verdana, 12 pt. (roughly 18 pt.)

See [item layout](#) in this section.

footnotes

When footnotes are used, a superscript 1 appears after the content to reference the first footnote, and so on. The number is located after punctuation marks except for a dash, which the superscript number precedes. A footnote appears at the bottom of the same page as the content to which it refers. The content being noted should appear as it does in the passage—if the word is capitalized in the passage, capitalize it in the footnote, and vice versa. A closed em dash is used between a word being defined in a footnote and the definition. The first word in a definition is capitalized only if the definition is a sentence or it is a proper noun. Include ending punctuation with a sentence. Otherwise, definitions are not punctuated.

Footnote - Example with 1 column passage

formulas

See [equations, expressions, and inequalities](#) in this section.

fractions

Write fractions in MathType using the fraction button.

Numerators and denominators are Verdana, 11 pt. The fraction bar is Verdana, 12 pt.

See [fraction](#) in MathType in this section.

alignment

Vertical lists that contain fractions (positive or negative) with mixed numbers (positive or negative) or integers with mixed numbers, but no improper fractions will be decimal aligned. (A decimal tab does not work with MathType because it is read as a whole number, so fractions are left-

aligned with each other so that the whole numbers are decimal aligned.)

Lists that contain any other combination of numbers with fractions will be centered by the widest entry, including the negative sign.

order

Vertical lists of fractions are ordered by denominator, then by numerator. If the item contains negative fractions, they should be listed together first with positive fractions appearing after them.

item layout

Print: One-column items are 20 picas wide.

Two-column items are 42 picas wide.

The examples on the next several pages show 13 item layouts for print.

$$\sum_{n=1}^6 [10 + 3(n-1)]$$

$$a(t) = 100(0.5)^{\frac{t}{1,620}}$$

$$\frac{x - \mu}{\sigma}$$

$$J(-1, 4)$$

$$f(x) = 2\sin\left(\frac{\pi}{4}x\right) - 3$$

$$A = P\left(1 + \frac{r}{n}\right)^{nt}$$

angle symbol

Angle sign from the Symbol Palette, followed by a Thin Space from the Symbol Palette.

comma

Comma from keyboard Style/Text, followed by a Thick Space and Thin Space from the Symbol Palette.

degree symbol

Degree symbol from keyboard (Mac: Option+Shift+8) Style/Text.

−30°C

See [degree symbol](#) in this section.

equations

$$f(x) = 3\sin\left(\frac{3\pi}{2}x - \frac{\pi}{2}\right)$$

$${}_nC_r = {}_{n-1}C_r + {}_{n-1}C_{r-1}$$

$$y = x + 12$$

$$f(f^{-1}(x)) = x$$

$$y = \left\lceil \frac{1}{2}x \right\rceil + 1$$

See [equations, expressions, inequalities](#) in this section.

exponents

$$4^5$$

$$y = a(x - h)^2 + k$$

$$\sqrt{x^2 + 1} = 4$$

$$|425 - x| \leq 1.6$$

$$\left(4^{\frac{2}{5}}\right)^3$$

Negative sign in superscript is from the Customized Toolbar, size of superscript is Superscript.

See [exponents](#) in this section.

expressions

$$f(x)$$

$$x + 12$$

$$C_r + {}_{n-1}C_{r-1}$$

$$f(f^{-1}(x))$$

$$\left[\frac{1}{2}x\right] + 1$$

$$3\sin\left(\frac{3\pi}{2}x - \frac{\pi}{2}\right)$$

See [equations, expressions, inequalities](#) in this section.

extra space

← 1-point Space from the Symbol Palette.

fraction square root

← Fraction Button from the Template Palette, Numerator and Denominator are Square Root Button from the Template Palette, size of Numerator and Denominator are Full -1.

fraction

See [fractions](#) in this section.

← Fraction Button from the Template Palette, size of Numerator and Denominator are Size User 1, negative sign in superscript is from the Customized Toolbar, size of superscript is Superscript.

$$\left(-\frac{2}{3}, \frac{136}{9}\right)$$

$$\frac{7^{\frac{5}{3}}}{7^{\frac{1}{3}}}$$

$$\frac{1}{2}$$

$$\frac{1}{x(3x+2)^2}$$

$$\frac{8!}{4!3!3!}$$

function name

'f' from keyboard Style/Text, followed by Thin Space from Symbol Palette, followed by Left Parens from Customized Toolbar, followed by 'x' from keyboard Style/Text, followed by Right Parens from Customized Toolbar.

inequalities

$$\sqrt[3]{18} < x < \sqrt[3]{54}$$

See [equations, expressions, inequalities](#) in this section.

infinity symbol

Symbol created in Verdana PS by Insert Symbol dialog in MathType, Style/Text.

matrix

'X' is Style/Math, equal sign from keyboard, Matrix objects use '3 row 3 column' Button from the Template Palette, MathType Matrix dialog is used for alignment and line placements.

multiplication symbols

Medium Dot Operator from the Symbol Palette, preceded and followed by a Thick Space from the Symbol Palette.

$$(2 \times 5)^2$$

$$\frac{9^{-4} \cdot 27^{\frac{1}{2}}}{243^{-2}}$$

See [multiplication symbols](#) in this section.

negative sign

Negative sign from keyboard, nudged up 7 times (appears approx. 5pts above baseline), followed by a Thin Space from the Symbol Palette.

-3

$\{-4, -\frac{2}{3}, 3, 7\}$

See [negative sign](#) in this section.

nth root

Square Root Button from the Template Palette, size of superscripts are Superscript, one superscript is preceded by a Thin Space from the Symbol Palette.

ordered pairs

(-1, 4)

parallel segment

Over-bar at beginning and end are from the Template Palette, the 'Parallel to' symbol is from the Symbol Palette which is preceded and followed by a Thin Space from the Symbol Palette.

parentheses

Use MathType “growing” parentheses for fractions, square roots, exponents, subscripts, or any other mathematical figure that would fall outside the “normal keyboard” parentheses. Use “normal keyboard” parentheses for all other situations.

Growing Parens from the Template Palette, Alignment defined by Fence Alignment dialog in MathType.

Left parens from keyboard Style/Text, followed by a Thin Space from the Symbol Palette.

Right parens from keyboard Style/Text, preceded by a Thin Space from the Symbol Palette.

period

Period from keyboard Style/Text.

placeholder box

'Box' from Template Palette (inside of box Style/Text and contains 3 spaces: 12pt, 9pt, 12pt), preceded and followed by a Thick Space from the Symbol Palette.

question mark

Question mark from keyboard Style/Text.

$$\frac{\pi}{8}, \frac{3\pi}{8}, \frac{5\pi}{8}, \frac{7\pi}{8}$$

1, 4, 7, 10

series

Number signs from keyboard followed by commas from Customized Toolbar, underscore is Style/Text, followed by 1-point Space from the Symbol Palette, followed by Comma from keyboard Style/Text, followed by Thick Space and 1-point Space from the Symbol Palette, followed by Period from keyboard Style/Text.

sizes defined

square root

$$r = \frac{2\sqrt{A}}{\sqrt{\pi}}$$

$$r_B = \sqrt[3]{\frac{8\pi V_A}{3}}$$

$$9\sqrt[4]{3}^3$$

DRAFT

styles defined The Style/Function is set as Frutiger 55 Roman to keep irregular spacing issues from occurring, most notably in fractions and square roots. However, this causes the punctuation to also be Frutiger. That is why punctuation buttons are on the toolbar—all punctuation must be set as text.

Best Practice MathType Preference Specifications - Define Styles

In MathType: Style | Define...

| Style | Font | Character Style | |

subscript

$$\frac{1}{2}\log_a 3 + \frac{1}{2}\log_a y - \log_a z$$

$$a_1 = 1$$

$$a_2 = 2$$

$$a_n = a_{n-1} + a_{n-2} + 1$$

See [subscripts](#) in this section.

subtraction sign

$$\log_5(x - 3) = 1 - \log_5(x + 1)$$

$$[d - (2 + 4i)][d - (2 - 4i)] = 0$$

text

Text from keyboard Style/Text, preceded and followed by 2 Thick Spaces from the Symbol Palette.

triangle symbol

'White up-pointing triangle' from Symbol Palette, followed by Thin Space from Symbol Palette, followed by 'X' from keyboard.

vertical difference

First row uses number signs from keyboard followed by a Thin Space from the Symbol Palette, second row uses the Under-bar from the Template Palette, Thin Space from the Symbol Palette followed by negative sign from keyboard followed by 2 Thick Spaces from the Symbol Palette, 2 number signs from keyboard followed by a Thin Space from the Symbol Palette.

multiplication symbols

Use the multiplication x for all grades.

Use the multiplication dot for grades 5 and higher.

Use only parentheses with no symbol for grades 6 and higher.

See [multiplication symbols](#) in MathType in this section.

negative sign

Negative signs are raised en dashes. See [negative sign](#) in MathType entry.

Write negative numbers in MathType.

In scale labels of graphs and grids, negative signs should be written in MathType.

See [negative sign](#) in MathType in this section.

numbered list

00. Stem stem stem stem.

1. animal
2. vegetable
10. mineral

Stem question stem question?

Numbered List

Font: Verdana Regular

Font size/leading: 12pt./16pt.

Alignment/spacing: decimal-aligned, 3p left indent, use an em space to align a mix of one-digit and two-digit numbers/1p space before and after list

ordered pairs

Write ordered pairs in MathType. See [ordered pairs](#) in MathType in this section.

outlines Outlines may follow the basic format of [numbered lists](#).

passages

paragraph numbering

Paragraph numbers are Verdana Regular, 12pt. font with 16pt. leading, left-aligned.

Every paragraph, including first and last paragraphs, is numbered in a literature passage.

Every fifth line, beginning with line 5, is numbered in a play. Do not number the first line. Stage directions are considered lines to be numbered.

Writing: Every sentence is numbered. A closing parenthesis follows each numeral. (e.g., 1), 2), 3), etc.)

plays, layout

Person speaking or performing stage directions is in Verdana Bold 12pt. capital letters. The name is followed by a period that is not bolded. Dialogue is in Verdana Regular 12pt. Stage directions are in Verdana Italic 12pt. When stage directions immediately follow the person's name, a comma is used rather than a period after the name and the stage directions are not within parentheses. When the stage directions are within dialogue, the italic text is within parentheses. e.g.,

BERT. I am so excited to go on our field trip tomorrow! I've never been to the natural history museum.

DANIEL. I'm excited to see the dinosaurs!

MARIANA. Do you think we will be able to look through the telescope even though we'll be there during the day? (*Looks up toward the sky.*) I think the stars are so interesting.

DANIEL, *looking through his book bag.* If I can find the paper Ms Harris gave us about the museum, we might be able to find out.

BERT. Oh no! I forgot to give Ms Harris the permission slip that my mom signed. (*Runs toward his locker.*) I'll see you guys tomorrow!

subheadings The space before and after subheadings is the same as the leading in the passage with no space after.

See [subheadings](#) in the passages entry in Language Requirements.

underlines

See [underlines](#) and [vocabulary words](#) in this section.

pattern (shape)

See [pattern \(shape\)](#) in Art Requirements.

percent

If answer options involve percents, the percent sign must appear after each number unless it is expressed as a decimal.

Percentages in a vertical list are left-aligned.

See [percent](#) in Language Requirements.

poems

line numbering Every fifth line, beginning with line 5, is numbered. Do not number the first line. Subheadings are not considered lines to be numbered.

point labels

Point labels are Verdana Italic 12pt., capital letters in text.

See [point labels](#) in Art Requirements.

punctuation

Punctuation is not bolded when a word preceding the punctuation is bold.

See [comma](#), [period](#), [question mark](#) in MathType in this section.

quotations

See [block quotations](#) in this section.

scientific notation

Use the multiplication x for scientific notation. Scientific notation is written in MathType, and uses default spacing before and after the x. (e.g., 9.0563×10^4 would equal 90,563.) Please note that the decimal number cannot exceed one digit.

Vertical lists of numbers in scientific notation are left aligned.

sequence number

Until items/stimuli are in a test format for print, the sequence number for each item/stimulus will be 00.

See [item layout 1](#) in this section.

sequences and patterns (number)

Use the appropriate button on the MathType toolbar to write sequences and patterns of numbers.

Grades 3–4: For mathematical patterns, use blanks with a question mark horizontally centered above the blanks to indicate the elements in the pattern/sequence that the student is asked to identify (number of blanks equals the number of next elements asked for in the item).

e.g., What are the next three numbers in the pattern?

2, 5, 8, 11, ?, ?, ?

Grades 5+: Use ellipses in the stem to indicate the continuation of a pattern. Items may ask either for the next element(s) or the nth element in the pattern, depending upon the item specifications and assessment limits.

e.g., What is the 10th element if the pattern continues?

2, 5, 8, 11, ...

See [pattern \(shape\)](#) in Art Requirements and [sequences](#) in MathType in this section.

side labels of geometric figures

Side labels are Verdana Italic, 12pt., lowercase letters in text.

See [side labels of geometric figures](#) in Art Requirements.

square roots

See [fraction square root](#) and [square root](#) in MathType in this section.

subscripts

Use the MathType button on the toolbar to write subscripts. See [subscript](#) and [sizes defined](#) and [spacing defined](#) in MathType in this section.

subtraction sign

The subtraction sign is an en dash in MathType. Use MathType to write subtraction signs.

See [equations, expressions, inequalities](#) in this section and [subtraction sign](#) in MathType in this section.

superscript

See [exponents](#) and [exponents, sizes defined](#), and [spacing defined](#) in MathType in this section.

thoughts

A person's thoughts, imagined dialogue, or other unspoken discourse is italicized and not put within quotation marks.

titles

book titles Book titles are italicized.

magazine titles Magazine titles are italicized.

passage titles When titles of paired or groups of passages are referenced in items, the titles should appear in the same order as the passages appear in the assessment.

When passage titles are written in items, retain the headline capitalization, do not use bold, and put quotation marks around the title.

Titles of short poems in items are within quotation marks.

thesaurus entries

important: big, meaningful,
significant, substantial

Thesaurus Entry

Font: Entry word, colon: Verdana Bold
Synonyms: Verdana Regular
Font size/leading: 12pt./16pt.
Alignment: left-aligned

Box

Line weight/color: 1pt./100% black
Alignment: left-aligned, 2p6 left indent
Padding: 0p8 left and right, 1p top and bottom
Maximum width: 19p6 (20p item) or 41p6 (42p item)

Keystrokes for Verdana:

- Trademark- tm, option, +2
- Copyright- option +g
- Registered trademark- option +r

See [trademarked names](#) in Language Requirements.

underlines

Underline the spaces between underlined words.

Mac users: Underlines are 1pt. rule, offset -3.

PC users: Use the underline feature in Word.

unique identification numbers (UINs)

The UIN appears in every item and passage but is removed from the final approved file that is used for deployment.

See [item layout 1](#) in this section.

variables

See [MathType](#) and [sizes defined](#) and [styles defined](#) in MathType in this section.

vocabulary words

A tested vocabulary word is underlined in the item stem.

Grades 3-6: Tested vocabulary words are underlined in the passage.

See [underlines](#) in this section.

| | |
|-----------------------|--|
| words as words | With the exception of vocabulary words, words referred to as words are italicized and not enclosed in quotation marks. |
| x-axis, y-axis | Italicize the x and y and hyphenate. |

DRAFT
